### 4 Summary of significant accounting policies

The accounting policies and the methods of computation adopted in preparation of this condensed interim financial information are the same as those applied in preparation of financial statements for the year ended December 31, 2023.

#### 4.1 Change in accounting policy

As disclosed in financial statements for the year ended December 31, 2023, the Company had changed its accounting policy of measuring its investment properties. Previously investment properties are measured at cost i.e. cost less any accumulated depreciation and any identified impairment loss. Investment properties represent constructed buildings which include the cost of land, and the value of land cannot be easily separable and were disclosed together since acquisition. Thus the depreciation is charged on the value of land as well, therefore, to avoid this anomaly, the management changed measurement policy of its investment properties from cost model to fair value model as per the relevant provisions of IAS 40.

4.2 The Company's financial and insurance risk management objectives and policies are consistent with those that were disclosed in the annual financial statements of the Company as at and for the year ended December 31, 2023.
